Weijiamei was founded in 2002 and has been deeply rooted in the silicone and plastic industry for more than two decades. We have solidified our core competitiveness by virtue of a strong integrated R&D and manufacturing capability. The company has built a full-chain standardized production system with a layout of a precision injection molding workshop, a silicone products workshop, a precision mold workshop, an auto parts production workshop and a modern quality packaging production line, realizing one-stop delivery from mold development and product manufacturing to quality packaging. Meanwhile, we have assembled a team of senior professionals in the industry, including an enterprise management team with rich practical experience, professional engineering and technical personnel as well as senior on-site operators. With professional competence and the craftsman spirit, we fully safeguard product quality and production efficiency.

我们秉承着“只做第一，不做第二！”的坚定信念
